FUND PERFORMANCE

FUND MANAGER'S COMMENTARY

The local bourse started the month low due to concerns over further rate hikes, slowing global growth and policy changes by the newly-elected government. However, it recovered towards the last few trading days and ended the month in positive territory due to window-dressing activities. Market sentiments may have also improved after Prime Minister Dato' Seri Anwar bin Ibrahim won a motion of confidence in Parliament on 19 December 2022. Foreign investors remained net sellers while local institutional investors were the largest net buyer for the month. The top three best-performing sectors in December 2022 were plantation, transport and healthcare while the top three worst-performing sectors were property, construction and telecom.

On the local front, the Malaysian Government Securities (MGS) was tracking the global bonds market at the beginning of the month ahead of the Federal Open Market Committee (FOMC) meeting and after Bank of Japan's (BoJ) unexpected hawkish shift. BoJ stayed dovish throughout 2022 and surprised the market with an increase in the upper target band for 10-year bonds to 0.5% from 0.25%. After the FOMC meeting, the local bonds traded rangebound and closed slightly lower amid the long holiday and taking cues from future government papers auctions in 2023. At the close, the 5-year MGS decreased by 11 basis points (bps) at 3.85% while the 10-year and 30-year MGS decreased by 3bps and 7bps month-on-month (m-o-m) to close at 4.08% and 4.26%, respectively.

Lastly, Malaysia's headline inflation for November 2022 remained unchanged and within expectations (4.0%; October 2022: 4.0%) although core inflation reached a new peak of 4.2%.

While fading reopening tailwinds and rate hikes will weigh on the growth in 2023, outlook is nonetheless anticipated to improve on the back of accelerating recovery at laggard sectors as reopening by China will boost trade, tourism and commodities demand as well as prices. We believe the government is unlikely to implement any negative policy changes relating to subsidies and taxes as it focuses on cost-of-living issues. Overall, we also believe in focusing on sufficient liquidity to take advantage of market weakness with medium-term investment objectives.

Looking ahead, our domestic bond yields have generally risen to pre-pandemic levels, suggesting opportunities for yield pick-up. We will continue to monitor the bond yield movement closely to capture opportunities in selected bonds to lock in attractive yields.

DISCLAIMER

VOLATILITY FACTOR

Based on the Fund's portfolio returns as at 31st Dec 2022, the Volatility Factor (VF) for this Fund is 11.33 classified as "Low" (Source: Lipper). "Low" includes funds with VF that are above 4.875 but not more than 11.695 (Source: Lipper). The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every 6 months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC.
