FUND PERFORMANCE

FUND MANAGER'S COMMENTARY

The local bourse started the month low due to concerns over further rate hikes, slowing global growth and policy changes by the newly-elected government. However, it recovered towards the last few trading days and ended the month in positive territory due to window-dressing activities. Market sentiments may have also improved after Prime Minister Dato' Seri Anwar bin Ibrahim won a motion of confidence in Parliament on 19 December 2022. Foreign investors remained net sellers while local institutional investors were the largest net buyer for the month. The top three best-performing sectors in December 2022 were plantation, transport and healthcare while the top three worst-performing sectors were property, construction and telecom.

While fading reopening tailwinds and rate hikes will weigh on the growth in 2023, outlook is nonetheless anticipated to improve on the back of accelerating recovery at laggard sectors as reopening by China will boost trade, tourism and commodities demand as well as prices. We believe the government is unlikely to implement any negative policy changes relating to subsidies and taxes as it focuses on cost-of-living issues. Overall, we also believe in focusing on sufficient liquidity to take advantage of market weakness with medium-term investment objectives.
