RISK FACTORS

General Risks of Investing in Unit Trust Fund

Market risk

Market risk refers to potential losses that may arise from adverse changes in the market conditions. Market conditions are generally, affected by, amongst others, economic and political stability. If the market which the unit trust fund invests in suffers a downturn or instability due to adverse economic or political conditions, this may adversely impact the market prices of the investments of a unit trust fund.

Liquidity risk

Liquidity risk refers to two scenarios. The first scenario is where an investment cannot be sold due to unavailability of a buyer for that investment. The second scenario is where the investment is thinly traded. This may cause the unit trust fund to dispose the investment at an unfavourable price in the market and may adversely affect investor's investment. This risk may be mitigated through stringent security selection process.

Inflation risk

This risk refers to the risk that investor's investment in unit trust fund may not grow or generate income at a rate that keeps pace with inflation, thus reducing investor's purchasing power even though the investment in monetary terms may have increased.

Risk of non-compliance

This risk arises from non-compliance with laws, rules and regulations, prescribed practices and the management company's internal policies and procedures, for example, due to oversight by the management company. Such non-compliance may force the management company to sell down the securities of the unit trust fund at a loss to rectify the non-compliance and in turn affect the value of the investors' investment in the unit trust fund. To mitigate this risk, the Manager has put in place internal controls to ensure its continuous compliance with laws, rules and regulations, prescribed practices and the Manager's internal policies and procedures.

Management company risk

The performance of a unit trust fund depends on the experience, expertise and knowledge of the management company. Should there be a lack of any of the above qualities by the management company, it may adversely affect the performance of the unit trust fund.

Specific Risks when Investing in the Fund

Country risk

The Fund may be affected by risks specific to the countries in which it invests. Such risks may be caused by but not limited to changes in the country's economic fundamentals, social and political stability, currency movements and foreign investment policies. These factors may have an impact on the prices of the Fund's investment in that country and consequently may also affect the Fund's NAV.

Currency risk

As the investments of the Fund may be denominated in currencies other than the base currency, any fluctuation in the exchange rate between the base currency and the currencies in which the investments are denominated may have an impact on the value of these investments. Investors should be aware that if the currencies in which the investments are denominated depreciate against the base currency, this will have an adverse effect on the NAV of the Fund in the base currency and vice versa. Investors should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.

The impact of the exchange rate movement between the base currency of the Fund and the currency of the underlying investments may result in a depreciation of the value of the investments as expressed in the base currency of the Fund.

Income distribution risk

It should be noted that the distribution of income is not guaranteed. The distribution of income is made from realised gains and/or realised income. As such, the Fund may not be able to distribute income if it does not receive such gains and/or income.

Related party transaction risk

The Fund may invest in CIS of other asset management companies which are related to the Manager and may also have dealings with parties related to these companies. However, all transactions with related parties are to be executed on terms which are best available to the Fund and based on best execution and at arms-length transaction between independent parties.

Specific Risks when Investing in CIS

Security risk

Adverse price movements of a particular securities invested by the CIS may adversely affect the CIS's net asset value. The investment manager of the CIS strives to mitigate the impact of a particular securities risk through portfolio diversification, which will help spread the element of risk.

Fund management of CIS risk

While the Manager will exercise due skill and care in selecting the CIS, it does not have control over the management of the CIS and there is no guarantee that the investment objectives will be met. This may result in Unit Holders suffering losses in their investments in the CIS.

Risk in Errors in calculation of the net asset value of the CIS

There is a possibility there are errors in calculation of the net asset value of the underlying CIS. In the event such errors occur, the net asset value of the CIS will be affected hence, the CIS will comply with the rules set forth in the relevant regulatory provisions applicable to the CIS. Compensation, if any, paid by the CIS (subject to the laws of the jurisdiction in which such CIS is domiciled), will be credited to the Fund as and when compensation is received.

Liquidity risk

Liquidity risk here refers to two scenarios. The first scenario is where the allocated liquidity of the CIS is insufficient to meet redemption needs. The second scenario is where the investments in the CIS are thinly traded. Should the investments in the CIS be thinly traded, this may cause the CIS to dispose the investment at an unfavorable price in the market and may adversely affect investors' investment. This risk may be mitigated through stringent security selection process.

Currency risk

This risk is associated with investments denominated in currencies different from the base currency of the CIS. The performance of the CIS may be affected by movements in the exchange rate between these two currencies. For example, should one currency weaken against the other currency, the investments may face currency loss / profit in addition to any capital gains or losses, which will affect the net asset value of the CIS.

Countries or foreign securities risk

This risk is associated with investments in securities listed or domiciled in countries other than the country of domicile. Any changes in the economic fundamentals, social and political stability, uncertainty or changes in countries' official currencies, currency movements and foreign investments policies in these countries may increase the volatility in asset values, liquidity and default risk which may have an impact on the prices of the securities that the CIS invests in and consequently may also affect the net asset value of the CIS.

Investments in certain markets may be restricted or controlled. In some countries, direct investments in securities may be prohibited and restricted due to regulatory requirements. These limitations may increase transaction costs and adversely affect a security's liquidity and the price in connection with the security.

The investment manager of the CIS will monitor and observe the developments in these countries where assets of the CIS are allocated. In addition, the investment manager of the CIS will also employ a systematic investment process, which includes regular review, to manage and mitigate this risk.

Interest rate risk

Generally, the value of fixed income securities will move inversely to interest rate movements. Therefore, the value of fixed income securities may fall when interest rates rise and vice versa. Fixed income securities of longer duration tend to be more sensitive to interest rate changes. To mitigate interest rate risk, the investment manager of the CIS will manage the duration of the portfolio based on their view of the trend of future interest rates.

Credit or default risk

Credit risk refers to the creditworthiness of the issuers of the fixed income securities held by the CIS and the issuers' expected ability to make timely payment of coupon and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the fixed income securities and hence the value of the CIS will be adversely affected. In the case of rated fixed income securities, this may lead to a credit downgrade.

Default risk refers to the inability of the issuer of the fixed income securities held by the CIS to make the coupon or principal payments when due. In the event the issuer defaults in the coupon or principal payments, the value of the CIS will be adversely

affected. The investment manager will mitigate the CIS's credit or default risk by performing continuous fundamental credit research and analysis to ascertain the creditworthiness of the issuer.

Counterparty risk

The CIS may be exposed to credit risk on the counterparties whom the CIS trades with. The CIS may place deposits and invest in money market instruments. In the event that the counterparty is not able to fulfil its obligations especially in the event of bankruptcy, this may lead to a loss to the CIS. This risk is mitigated by the investment manager of the CIS through conducting credit evaluation on the counterparty to ascertain the creditworthiness of the counterparty.

Derivatives risk

The investment manager of the CIS may invest in derivatives for hedging and efficient portfolio management purposes. Derivatives' market values may be subject to wide fluctuations and expose the CIS to potential gains and losses due to mark-to-market value. Some of the risks associated with derivatives are, but not limited to, market risk, management company risk, counterparty risk, and liquidity risk.

THE ABOVE SHOULD NOT BE CONSIDERED TO BE AN EXHAUSTIVE LIST OF THE RISKS WHICH INVESTORS SHOULD CONSIDER BEFORE INVESTING INTO THE FUND. INVESTORS SHOULD BE AWARE THAT AN INVESTMENT IN THE FUND MAY BE EXPOSED TO OTHER RISKS FROM TIME TO TIME. INVESTORS SHOULD CONSULT A PROFESSIONAL ADVISER FOR A BETTER UNDERSTANDING OF THE RISKS.

TAXATION OF THE FUND AND UNIT HOLDERS

Dear Sirs,

This letter has been prepared for inclusion in the prospectus in connection with the Eastspring Investments Global Balanced Target Return Fund ("the Fund").

The taxation of income for both the Fund and the Unit Holders are subject to the provisions of the Malaysian Income Tax Act 1967 ("the Act"). The applicable provisions are contained in Section 61 of the Act, which deals specifically with the taxation of trust bodies in Malaysia.

TAXATION OF THE FUND

The Fund will be regarded as resident for Malaysian tax purposes since the Trustee of the Fund is resident in Malaysia.

(1) Domestic Investments

i. General taxation

Subject to certain exemptions, the income of the Fund consisting of dividends or interest (other than interest which is exempt from tax) and other investment income derived from or accruing in Malaysia, after deducting tax allowable expenses, is liable to Malaysian income tax at the rate of 24 per cent.

Gains on disposal of investments in Malaysia by the Fund will not be subject to Malaysian income tax.

ii. Dividends and Other Exempt Income

Effective 1 January 2014, all companies would adopt the single-tier system. Hence, dividends received would be exempted from tax and the deductibility of expenses incurred against such dividend income would be disregarded. There will no longer be any tax refund available for single-tier dividends received. Dividends received from companies under the single-tier system would be exempted.

The Fund may receive Malaysian dividends which are tax exempt. The exempt dividends may be received from investments in companies which had previously enjoyed or are currently enjoying the various tax incentives provided under the law. The Fund will not be taxable on such exempt income.

Interest or discount income derived from the following investments is exempt from tax:

- (a) Securities or bonds issued or guaranteed by the government of Malaysia;
- (b) Debentures¹ other than convertible loan stocks, approved or authorised by, or lodged with, the SC; and
- (c) Bon Simpanan Malaysia issued by Bank Negara Malaysia.

Interest derived from the following investments is exempt from tax:

- (a) Interest paid or credited by any bank or financial institution licensed under the Financial Services Act 2013 and Islamic Financial Services Act 2013;
- (b) Interest paid or credited by any development financial institution regulated under the Development Financial Institutions Act 2002;
- (c) Bonds, other than convertible loan stocks, paid or credited by any company listed in Bursa Malaysia Securities Berhad ACE Market; and
- (d) Interest paid or credited by Malaysia Building Society Berhad².

The interest or discount income exempted from tax at the Fund level will also be exempted from tax upon distribution to the Unit Holders.

(2) Foreign Investments

Income of the Fund in respect of income received from overseas investment is exempt from Malaysian tax by virtue of Paragraph 28 of Schedule 6 of the Act and distributions from such income will be tax exempt in the hands of the Unit Holders. Such income from foreign investments may be subject to foreign taxes or withholding taxes. Any foreign tax suffered on the income in respect of overseas investment is not tax refundable to the Fund.

The foreign income exempted from Malaysian tax at the Fund level will also be exempted from tax upon distribution to the Unit Holders.

(3) Hedging Instruments

The tax treatment of hedging instruments would depend on the particular hedging instruments entered into.

Generally, any gain / loss relating to the principal portion will be treated as capital gain / loss. Gains / losses relating to the income portion would normally be treated as revenue gains / losses. The gain / loss on revaluation will only be taxed or claimed upon realisation. Any gain / loss on foreign exchange is treated as capital gain / loss if it arises from the revaluation of the principal portion of the investment.

(4) Income from Malaysia Real Estate Investment Trusts (“REITs”)

Income from distribution from REITs will be received net of final withholding tax of 10 per cent. No further tax will be payable by the Fund on the distribution. Distribution from such income by the Fund will also not be subject to further tax in the hands of the Unit Holders.

(5) Tax Deductible Expenses

Expenses wholly and exclusively incurred in the production of gross income are allowable as deductions under Section 33(1) of the Act. In addition, Section 63B of the Act provides for tax deduction in respect of Managers’ remuneration, expenses on maintenance of the register of Unit Holders, share registration expenses, secretarial, audit and accounting fees, telephone charges, printing and stationery costs and postages based on a formula subject to a minimum of 10 per cent and a maximum of 25 per cent of the expenses.

(6) Real Property Gains Tax (“RPGT”)

With effect from 1 January 2019, any gains on disposal of real properties or shares in real property companies³ (“chargeable asset”) would be subject to RPGT as follows:-

Disposal time frame	RPGT rates
Within 3 years	30%
In the 4 th year	20%
In the 5 th year	15%
In the 6 th year and subsequent years	10%

(7) Sales and Service Tax (“SST”)

Effective from 1 September 2018, SST has been reintroduced to replace the Goods and Services Tax (“GST”). Both the Sales Tax Act 2018 and Services Tax Act 2018 have been gazetted on 28 August 2018. The rates for sales tax are nil, 5 per cent, 10 per cent or a specific rate whereas the rate for service tax is at 6 per cent.

Sales tax will be chargeable on taxable goods manufactured in or imported into Malaysia, unless specifically exempted by the Minister. Whereas, only specific taxable services provided by specific taxable persons will be subject to service tax. Sales tax and service tax are single stage taxes. As such, SST incurred would generally form an irrecoverable costs to the business.

In general, the Fund, being collective investment vehicle, will not be caught under the service tax regime.

Certain brokerage, professional, consultancy or management services obtained by the Fund may be subject to service tax at 6 percent. However, fund management services and trust services are excluded from service tax. With effect from 1 January 2019, service tax will apply to any taxable service that is acquired by any business in Malaysia from a non-Malaysian service provider. In this connection, the Fund, being non-taxable person who acquire imported taxable services (if any) will need to declare its imported taxable services through the submission of prescribed declaration, i.e. Form SST-02A to the Royal Malaysian Customs Department (“RMCD”).

TAXATION OF UNIT HOLDERS

Unit Holders will be taxed on an amount equivalent to their share of the total taxable income of the Fund to the extent of the distributions received from the Fund. The income distribution from the Fund will carry a tax credit in respect of the tax paid by the Fund. Unit Holders will be entitled to utilise the tax credit against the tax payable on the income distribution received by them. No additional withholding tax will be imposed on the income distribution from the Fund.

Corporate Unit Holders, resident⁴ and non-resident, will generally be liable to income tax at 24 per cent on distribution of income received from the Fund. The tax credits attributable to the distribution of income can be utilised against the tax liabilities of these Unit Holders.

Individuals and other non-corporate Unit Holders who are tax resident in Malaysia will be subject to income tax at graduated rates ranging from 1 per cent to 28 per cent. Individuals and other non-corporate Unit Holders who are not resident in Malaysia will be subject to income tax at 28 per cent. The tax credits attributable to the distribution of income will be utilised against the tax liabilities of these Unit Holders.

Non-resident Unit Holders may also be subject to tax in their respective jurisdictions and depending on the provisions of the relevant tax legislation and any double tax treaty with Malaysia, the Malaysian tax suffered may be creditable in the foreign tax jurisdictions.

The distribution of exempt income and gains arising from the disposal of investments by the Fund will be exempted from tax in the hands of the Unit Holders.

Any gains realised by Unit Holders (other than those in the business of dealing in securities, insurance companies or financial institutions) on the sale or redemption of the Units are treated as capital gains and will not be subject to income tax. This tax treatment will include in the form of cash or residual distribution in the event of the winding up of the Fund.

Unit Holders electing to receive their income distribution by way of investment in the form of new Units will be regarded as having purchased the new Units out of their income distribution after tax.

Unit splits issued by the Fund are not taxable in the hands of Unit Holders.

We hereby confirm that the statements made in this report correctly reflect our understanding of the tax position under current Malaysian tax legislation. Our comments above are general in nature and cover taxation in the context of Malaysian tax legislation only and do not cover foreign tax legislation. The comments do not represent specific tax advice to any investors and we recommend that investors obtain independent advice on the tax issues associated with their investments in the Fund.

Yours faithfully,
for and on behalf of

UNIT TRUST LOAN FINANCING RISK DISCLOSURE STATEMENT**Investing in a Unit Trust Fund with Borrowed Money is More Risky than Investing with Your Own Savings**

You should assess if loan financing is suitable for you in light of your objectives, attitude to risk and financial circumstances. You should be aware of the risks, which would include the following:

1. The higher the margin of financing (that is, the amount of money you borrow for every ringgit of your own money which you put in as deposit or down payment), the greater the loss or gain on your investment.
2. You should assess whether you have the ability to service the repayments on the proposed loan. If your loan is a variable rate loan, and if interest rates rise, your total repayment amount will be increased.
3. If unit prices fall beyond a certain level, you may be asked to provide additional acceptable collateral (where units are used as collateral) or pay additional amounts on top of your normal instalments. If you fail to comply within the time prescribed, your units may be sold towards the settlement of your loan.

4. Returns on unit trusts are not guaranteed and may not be earned evenly over time. This means that there may be some years where returns are high and other years where losses are experienced. Whether you eventually realise a gain or loss may be affected by the timing of the sale of your units. The value of units may fall just when you want your money back even though the investment may have done well in the past.

This brief statement cannot disclose all the risks and other aspects of loan financing. You should therefore carefully study the terms and conditions before you decide to take a loan. If you are in doubt about any aspect of this risk disclosure statement or the terms of the loan financing, you should consult the institution offering the loan.
