PRODUCT SUITABILITY

2. Who is this product suitable for?

The Fund is designed for Sophisticated Investors who seek capital appreciation and regular income over medium to long-term investment horizon.

KEY PRODUCT FEATURES

3. What am I investing in?

Classes	USD Class	MYR Class	MYR Hedged-class	SGD Hedged-class	AUD Hedged-class
Launch date	29 April 2026				
Initial Offer Price	USD 0.50	MYR 0.50	MYR 0.50	SGD 0.50	AUD 0.50
	The initial offer price is the Selling Price and Repurchase Price for each Units during the initial offer period.				
Initial Offer Period	➤ The initial offer period for USD Class, MYR Class, MYR Hedged-class, SGD Hedged-class and AUD Hedged-class shall be for a period of not more than forty-five (45) days from the Commencement Date. The initial offer period may be shortened if we determine that it is in your best interest. ➤ The initial offer period for GBP Hedged-class, EUR Hedged-class and RMB Hedged-class will be one (1) day which is on the launch date of the particular Class. The launch date will be disseminated through official communication channels and Communiqués to the Unit Holders and a supplemental/replacement information memorandum will be issued for the launch of the particular Class.				
Tenure	The Fund is an open-ended fund where it does not have a fixed maturity date and may only be terminated in accordance with the terms of the Information Memorandum and the provisions of the Deed.				
Base Currency	USD				
Asset allocation	➤ A minimum of 85% of the Fund's NAV to be invested in the Target Fund; and ➤ A maximum of 15% of the Fund's NAV to be invested in Islamic money market instruments, Islamic deposits and/or Islamic derivatives for hedging purposes.				
Investment strategy	The Fund will be investing a minimum of 85% of the Fund's NAV in the Target Fund and a maximum of 15% of the Fund's NAV in Islamic money market instruments, Islamic deposits and/or Islamic derivatives for hedging purposes. While the Fund is highly invested in the Target Fund, we will ensure that the Fund has sufficient liquidity to meet the repurchase requests made by the Unit Holders. The Fund will be actively rebalanced from time to time to meet sales and withdrawals transactions. This is to enable a proper and efficient management of the Fund. As the Fund is a feeder fund that invests predominantly in the Target Fund, we do not intend to take temporary defensive position for the Fund during adverse market, economic and/or any other conditions. This is to allow the Fund to mirror the performance of the Target Fund in either bullish or bearish market conditions. However, the Management Company and/or investment manager(s) of the Target Fund may take temporary defensive position when deemed necessary. We may substitute the Target Fund with another fund that has a similar investment objective with the Fund, if, in our opinion, the Target Fund no longer meets the Fund's investment objective. However, this is subject to the Unit Holders' approval before such changes are made. Islamic Derivatives Islamic derivatives trades may be carried out for hedging purposes through Islamic financial instruments including, but not limited to, Islamic forward contracts, Islamic futures contracts and Islamic swaps. Islamic futures contracts and Islamic forward contracts are generally contracts between two parties to trade an asset at an agreed price on a pre-determined future date whereas Islamic swaps is an agreement to swap or exchange two Islamic financial instruments between two parties. These instruments may be used to hedge the principal and/or the returns of the foreign-currency denominated investments back to the Base Currency. The intention of hedging is to preserve the value of the assets from any adverse price movements. While the hedging strategy will assist in mitigating the potential foreign exchange losses by the Fund, any potential foreign exchange gains from the hedging strategy will be capped as well.				

Classes	USD Class	MYR Class	MYR Hedged-class	SGD Hedged-class	AUD Hedged-class
	The Fund adopts commitment approach to measure the Fund's global exposure to Islamic derivatives. The commitment approach is a methodology that aggregates the underlying market values or notional values of Islamic derivatives after taking into account the possible effects of netting and/or hedging arrangements. The Fund's global exposure from the Islamic derivatives position must not exceed 100% of NAV of the Fund at all times.				
Distribution policy	Subject to the availability of income, the Fund will make distribution to the Unit Holders on a monthly basis. However, the amount of income available for distribution may fluctuate from month to month. At our discretion, the Fund may distribute (1) realised income, (2) realised capital gains, (3) unrealised income, (4) unrealised capital gains, (5) capital or (6) a combination of any of the above.

4. Who am I investing with?

Relevant parties' information:

The Manager	AHAM Asset Management Berhad
The Trustee	CIMB Islamic Trustee Berhad
External Fund Manager	AIIMAN Asset Management Sdn. Bhd.
Shariah Adviser	Amanie Advisors Sdn. Bhd.

5. What are the possible outcomes of my investment?

The Fund is a wholesale feeder fund that invests in the Target Fund, which in turn invests into a diversified portfolio of Shariah-compliant equity and fixed income securities. The performance of the Target Fund is dependent on the performance of the underlying investment that it holds.

As such, the value of your investments will be reliant on the performance of the Target Fund. This means that if the Target Fund performs well, the Fund may reflect similar performance and likewise if the performance of the Target Fund falls, the value of your investment will also be affected. The Fund's performance is dependent on the investment manager's expertise in managing the Fund.

Please note that the capital and returns of the Fund are not guaranteed.

* We may, at our absolute and sole discretion at any time and without having to assign any reason, increase the transaction value and the number of Units stated above without having to seek Unit Holders' prior approval. You will be notified of any such increase by way of a Communiqué and the prospective investors will be notified of the same by way of a supplemental/replacement information memorandum.

At the same time, the transaction value and the number of Units may be reduced at our discretion, including for transactions submitted via digital channels, subject to the terms and conditions disclosed through the relevant platforms.

KEY RISKS

6. What are the key risks associated with this product?

General risks

- **Market risk** - Market risk arises because of the factors that affect the entire market place. Factors such as economic growth, political stability and social environment are some examples of conditions that have an impact on businesses, whether positive or negative. Market risk cannot be eliminated but may be reduced through diversification. It stems from the fact that there are economy-wide perils, or instances of political or social instability which threaten all businesses. Hence, the Fund will be exposed to market uncertainties and fluctuations in the economic, political and social environment that will affect the market price of the investments either in a positive or negative way.
- **Fund management risk** - This risk refers to the day-to-day management of the Fund by us which will impact the performance of the Fund. For example, investment decisions undertaken by us as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the Deed, relevant laws or guidelines due to factors such as human error, fraud, dishonesty or weaknesses in operational process and systems, may adversely affect the performance of the Fund.
- **Performance risk** - The Fund is a feeder fund which invests in another collective investment scheme, namely the Target Fund. The performance of the Fund very much depends on the performance of the Target Fund. If the Target Fund does not perform in accordance with its investment objective, the performance of the Fund will also be impacted negatively. The performance of the Target Fund and consequently of the Fund may go down as well as up, depending on the circumstances prevailing at a particular given time. On that basis, there is never a guarantee that investing in the Fund will produce a positive investment return in accordance with its investment objective.
- **Liquidity risk** - This is the risk that the shares of the Target Fund that is held by the Fund cannot be readily sold and converted into cash. This can occur when there is a restriction on realisation of shares of the Target Fund. The Management Company may suspend the realisation of shares of the Target Fund or delay the payment of realisation proceeds in respect of any realisation request received, during any period in which the determination of the net asset value of the Target Fund is suspended. As a result, the Fund may not be able to receive the repurchase proceeds in a timely manner which in turn may delay the payment of repurchase proceeds to the Unit Holders. In managing liquidity risk, we will maintain sufficient liquidity level for the purposes of meeting repurchase requests. Please refer to the *"Suspension of Dealing in Units"* section in the Information Memorandum for more details.
- **Operational risk** - This risk refers to the possibility of a breakdown in our internal controls and policies. The breakdown may be a result of human error, system failure or fraud where our employees collude with one another. This risk may cause monetary loss and/or inconvenience to you. We will review our internal policies and system capability to mitigate instances of this risk. Additionally, we maintain a strict segregation of duties to mitigate instances of fraudulent practices amongst our employees.
- **Inflation risk** - This is the risk that your investment in the Fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
- **Financing risk** - This risk occurs when you take a financing to finance your investment. The inherent risk of investing with financed money includes you being unable to service the financing payments. In the event Units are used as collateral, you may be required to top-up your existing instalment if the prices of Units fall below a certain level due to market conditions. Failing which, the Units may be sold at a lower NAV per Unit as compared to the NAV per Unit at the point of purchase towards settling the financing.
- **Suspension of repurchase request risk** - Having considered the best interests of Unit Holders, the repurchase requests by the Unit Holders may be subject to suspension due to exceptional circumstances, where the market value or fair value of a material portion of the Fund's assets cannot be determined, or such other circumstances as may be determined by the Manager, where there is good and sufficient reason to do so. The exceptional circumstances may involve the suspension of dealing by the Target Fund upon the occurrence of any events mentioned in the *"Suspension of Calculation of Net Asset Value of the Target Fund"* section in the Information Memorandum. In such case, Unit Holders will not be able to redeem their Units and will be compelled to remain invested in the Fund for a longer period of time*. Hence, their investments will continue to be subject to the risks inherent to the Fund.
 *For further information on repurchase process during suspension period, please refer to *"What is the Repurchase Proceeds Payout Period?"* section in the Information Memorandum.
- **Related party transaction risk** - The Fund may also have dealings with parties related to AHAM. Nevertheless, it is our policy that all transactions with related parties are to be executed on terms which are best available to the Fund and which are not less favourable to the Fund than an arm's length transaction between independent parties.

Specific risks

- **Concentration risk** - As a feeder fund, the Fund invests in a single collective investment scheme. Any adverse effect on the Target Fund will inevitably affect the Fund as well. The performance of the Fund is also dependent on the performance of the Target Fund. However, the Manager will substitute the Target Fund with another fund with similar investment objective of the Fund if, in its opinion, the Target Fund no longer meets the Fund's investment objective subject to Unit Holders' approval.
 For better understanding of the risks associated to the Target Fund, please refer to the *"Risks of the Target Fund"* below.
- **Country risk** - Investments of the Fund in the Target Fund which is domiciled in Luxembourg may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of Luxembourg. For example, the deteriorating economic condition of such country may adversely affect the value of the investments undertaken by the Fund. This in turn may cause the NAV of the Fund or prices of Units to fall.
- **Counterparty risk** - The Fund will be exposed to the credit risk of the parties with which it transacts and may also bear the risk of settlement default. Credit risk is the risk that the counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. This would include the counterparties to derivatives that it enters into. Trading in derivatives which have not been collateralised gives rise to direct counterparty exposure. The Fund mitigates much of its credit risk to its derivatives counterparties by receiving collateral with a value at least equal to the exposure to each counterparty but, to the extent that any derivative is not fully collateralised, a default by the counterparty may result in a reduction in the value of the Fund. A formal review of each new counterparty is completed and all approved counterparties are monitored and reviewed on an ongoing basis. The Fund maintains an active oversight of counterparty exposure and the collateral management process.
- **Currency risk** - As the investments of the Fund may be denominated in currencies other than the Base Currency, any fluctuation in the exchange rate between the Base Currency and the currencies in which the investments are denominated may have an impact on the value of these investments. You should be aware that if the currencies in which the investments are denominated (other than USD) depreciate against the Base Currency, this will have an adverse effect on the NAV of the Fund in the Base Currency and vice versa. You should note that any gain or loss arising from the fluctuation in the exchange rate may further increase or decrease the

returns of the investment.

Currency risk at the Class level

The impact of the exchange rate movement between the Base Currency and the currency of the respective Classes (other than USD Class) may result in a depreciation of your holdings as expressed in the Base Currency.

Currency risk at the Hedged-class level

Currency hedging reduces the effect of exchange rate movements for the Hedged-class, but it does not entirely eliminate currency risk between the Hedged-class and the Base Currency (not a perfect hedge). Hence, the unhedged portion of the respective Hedged-class will still be affected by the exchange rate movements and it may cause fluctuation of NAV of the respective Hedged-class. You should note, however, that if the exchange rate moves favourably, the Hedged-class would not benefit from any upside in currency movement due to the hedging strategy. In addition, hedging is subject to a minimum investment size of entering into a forward contract and the cost of hedging which may affect returns of the respective Hedged-class.

- **Distribution out of capital risk** – The Fund may distribute income out of capital. Such capital distributions represent a return or withdrawal of part of the amount of your original investment and/or capital gains attributable to the original investment and will result in a reduction in the NAV per Unit of the Fund and reduce the capital available for future investment and capital growth. Future capital growth may therefore be constrained.
- **Target fund manager risk** – The Target Fund (which the Fund invests in) is managed by the Management Company and/or investment manager(s). It is important to note that the Manager has no control over the investment management techniques and operational controls of the Management Company and/or investment manager(s). Thus, mismanagement of the Target Fund (i.e. breach of its prescribed investment restriction due to human error) may negatively affect the Fund (as an investor of the Target Fund). Should such a situation arise, the Manager may propose to invest in other alternative collective investment scheme that is consistent with the investment objective of the Fund provided always that the approval of the Unit Holders has been obtained.
- **Shariah non-compliance risk** – As the Fund can only invest in Shariah-compliant investments, there is always a risk that losses may be suffered by the Fund when the Manager is forced to dispose investments to rectify any Shariah non-compliance. This risk is mitigated through the appointment of a Shariah adviser, who will be responsible to ensure that the Fund is managed and administered in accordance with Shariah requirements.
